DANIIL KAMINSKYI

APPLICATION DEVELOPER

SUMMARY

As a student of programming, I have a strong foundation in C++ and C#. My studies at the institute have enabled me to develop my strategic thinking skills as well as hone my attention to detail. In addition, I am an enthusiastic creator of videos and music, with Blender being one of my favorite tools for expressing myself artistically. Despite not having any professional experience in this field yet, I am confident that these abilities will be valuable assets when it comes to working on programming projects or tasks.

EDUCATION

September 2021 - Present
Collegium Da Vinci
Programing
